

System A2

KLB INDUSTRIAL EP Rapid

Rapid-setting and quickly reusable epoxy resin coating in smooth or slightly non-slip

The coating system A2 is mainly used for industrial and commercial floorings exposed to medium mechanical load. The special product combination enables a fast hardening and thus, makes it possible to install the system in a very short period of time. By injecting structured granulate **Strukturgranulat RQX 9/RQX 10**, the surface can be set to be slightly non-slip with a slip-resistance grade of R9 or R10.

The coating is very resistant to mechanical loads, particularly from industrial trucks. The rapid-setting and universal system complies with the requirements for industrial production areas or warehouse facilities, but also for several other economic sectors, whenever a quick reusability is needed.

Alternatives: [System A3](#) for a higher slip-resistance, [System A1](#) with longer curing times.

3. Top coat **KLB-SYSTEM EPOXID EP 216 RAPID** - optional: injecting structured granulate **Strukturgranulat RQX 9/RQX 10**
2. Scratch coat with **KLB-SYSTEM EPOXID EP 51 RAPID S** and mixed sand **KLB-Mischsand 2/1**
1. Primer **KLB-SYSTEM EPOXID EP 51 RAPID S**

System build-up

Layer	See product information for more details
Total layer thickness	approx. 1 - 3 mm
Optionally	Blowing in structured granulate Strukturgranulat RQX 9 or RQX 10
Top coat (3)	KLB-SYSTEM EPOXID EP 216 RAPID
Scratch coat (2)	KLB-SYSTEM EPOXID EP 51 RAPID S* with mixed sand KLB-Mischsand 2/1
Primer (1)	KLB-SYSTEM EPOXID EP 51 RAPID S* <small>*alternatively, EP 52 RAPID can be used.</small>
Substrate	Requirements to the substrate according to BEB worksheets and our primer list or by consultancy from our technical sales service/ application technology

Area of application

Industry:

- Manufacturing and production
- Storage and logistics
- Laboratory
- Rapid-setting coatings

Agriculture:

- Milking parlours and milk rooms
- Animal husbandry and feeding tables

Foodstuffs:

- Food markets and sales areas

Automotive, garages and car parks:

- Car parks, parking decks and underground parking lots
- Manufacturing and production

Technical data

Bending tensile strength (EP 216 Rapid)	60	N/mm ²	DIN EN 196/1
Compressive strength (EP 216 Rapid)	58	N/mm ²	DIN EN 196/1
Shore-hardness D (EP 216 Rapid)	80	-	DIN 53505 (after 7 days)
Abrasion (Taber Abraser) (EP 216 Rapid)	65	mg	ASTM D4060 (CS10/1000)

The values established in tests are average values. Deviations from the product specification may occur.

Tests and certifications

The following external test certificates are available for the system:

- Fire behaviour classification according to DIN EN 13501-01:2010-01: C_{fl}-s1
- Slip-resistance according to DIN 51130 and BGR 181: grades R9/R10 by injection of structured granulate **Strukturgranulat RQX 9** or **RQX 10**
- Declaration of performance in accordance with Annex III to Regulation (EU) No. 305/2011 (Construction Products Regulation)
- Declaration of product conformity with Environmental Product Declarations (EPD)
