

KLB-SYSTEM Stellmittel 5 FT

Thixotropic and suspending agent for reactive resins

Packaging units

Article no.	Packaging	Content (kg)	Units/pallet
ZS6954-90	Hobbock	1.50 kg	12
ZS6954-50	Bag	10.00 kg	18

Product characteristics

Appearance	White, fibrous powder
Bulk weight	80 g/l
Application quantity	2 - 5 % w/w

Product description

Suspending agent based on polyethylene fibres for thickening reactive resins when applied to vertical surfaces and slopes as well as for filling pores.

KLB-SYSTEM STELLMITTEL 5 FT can be processed easily and without introducing dust.

- Thickening of primers, e.g. **KLB-SYSTEM EPOXID EP 50** when used as a primer on walls, as scratch coat or for closing joints.
- Thickening of coatings, e.g. **KLB-SYSTEM EPOXID EP 200 VF** for the production of concave skirting.
- Thickening of mortar resins, e.g. **KLB-SYSTEM EPOXID EP 150** with an addition for levelling ramps, holes, indentations, etc.
- Thickening of coatings if slopes must be worked on and moved.
- Versatile thickening agent, multi-purpose and economical.

Processing

Mix resin and hardener based on the processing instructions. Then add suspending agent **KLB-SYSTEM STELLMITTEL 5 FT**, e.g. by means of volumetric dosing (measuring cup or similar), completely stir and refill, if necessary. For example, add 120 - 150 g (= approx. 1.5 l volume dosed) for pebble coatings.

Storage

Can be stored indefinitely long when being in a dry place.
