The Object

Company Multivac
D-87787 Wolfertschwenden

Category: Commercial kitchen

Area size: 400 m²

Completion: Nov 2020

Floor covering:

Robust and slip-resistant coating

Area type:

Wet-stressed surfaces in kitchen areas

Requirements:

Ensuring occupational safety and durability

Insight: Surface with many advantages

Kitchen coating systems that are water or chemical resistant, non-slip and easy to clean at the same time guarantee long economic usability. In this particular material combination, our system offers a robust surface that promises safety in everyday work and low maintenance effort.

Slip-resistant scattered coating for safe standing.

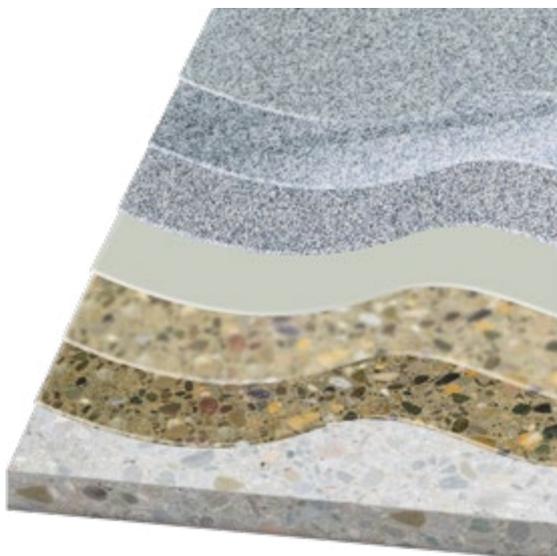

Concave covings improve the cleanability of the flooring.

KLB KITCHEN EP Standard

FOODSTUFFS / COMMERCIAL KITCHENS

In the food processing sector, the **H1 KLB KITCHEN EP Standard system** is especially suitable for commercial and industrial kitchens due to its anti-slip, chemically resistant and insensitive surface.

The slip resistance is achieved by a resilient flow coating, which has been scattered with coloured quartz sand to prevent slipping and ensure work safety. Chemical stability ranges from very good resistance against various chemicals to resistance against water, salts or saline solutions, alkalis and alkaline solutions as well as mineral acids, e.g. hydrochloric acid.

A final matt sealer serves both visual purposes and higher requirements for chemical-resistant surface protection. The matt sealant also provides a smoother, even floor appearance without any mirror effects. After drying, the product hardens to a well adhering, robust film.

The transition from floor to wall was made seamless with concave covings for good cleanability and uncomplicated maintenance. This fulfills the increased demands on hygiene in the kitchen area. Scattering with coloured quartz sand also offers the possibility of visual individuality.

Matt sealer **KLB-SYSTEM EPOXID EP 860**

Top sealer **KLB-SYSTEM EPOXID EP 172**

Wearing layer **KLB-SYSTEM EPOXID EP 216**,
fully scattered with coloured quartz sand **KLB-Colorquarzsand**

Composite sealant **KLB-SYSTEM EPOXID EP 290 Flex**

Scratch coat with **KLB-SYSTEM EPOXID EP 50**
and mixed sand **KLB-Mischsand 2/1**

Primer **KLB-SYSTEM EPOXID EP 50**
