"Polestar Space" Stuttgart

KLB
KÖTZTAL

The Object

Polestar Space

Car dealership

D-70173 Stuttgart

Category: Car dealership

Area size: 350 m²

Completion: May 2021

Floor covering:

Visually appealing, low-emission floor covering

Area type:

Exhibition area

Requirements:

Modern, exclusive look combined with good cleanability

Insight: Harmonious, modern design

For the coating used in the Polestar Space showroom, high demands were placed on appearance and design. The modern, technical look of the presentation room underlines the cars' sporty character. Tyres of permanently parked vehicles must be underlaid due to possible plasticiser migration.

The flooring's clean and stylish design supports the high-tech, exclusive effect the presentation room has on visitors.

KLB INDUSTRIAL LOW-VOC PU Comfort Sealed

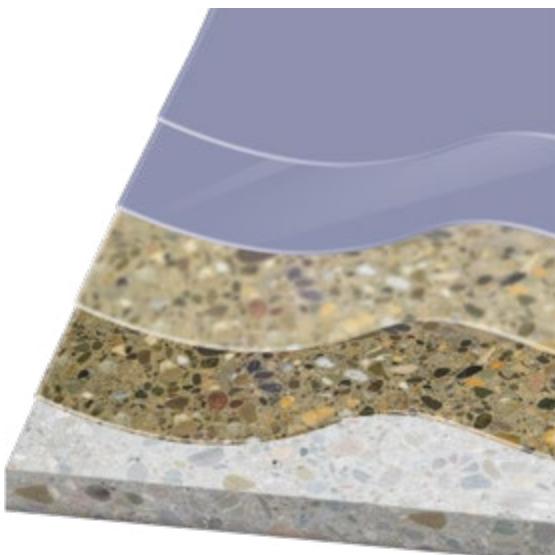

OFFICES AND PUBLIC FACILITIES / TRADE AND PRESENTATION

Not bound by usual conventions: "Polestar Space" in Stuttgart puts ordinary car dealerships in the shade. The **G3 KLB INDUSTRIAL LOW-VOC PU Comfort Sealed system** acts complementing to the holistic, neat design of the exhibition area through a consistent floor concept. A uniform and bright look visually enhances the spaciousness of the showroom, putting the focus entirely on the displayed vehicles.

The restrained, simple, but at the same time upscale and functional design leaves space for the visitor's imagination. In a unique environment - similar to an art exhibition - the presentation hall creates a feeling of exclusivity for the audience.

With this object, however, it is not only the optical properties of the covering that play a role. The floor system impresses with its very good cleanability and is also only slightly susceptible to soiling. The coloured matt sealer's good resistance to engine oil, aqueous solutions, diluted acids and alkalis is of particular advantage for this exhibition surface.

Large window fronts give the entrance of the "Space" an open and inviting character. The resulting solar radiation is no challenge for the covering due to its very good UV stability. The robust surface also permanently withstands heavy public traffic and cars driving in or out of the building.

Matt sealer

KLB-SYSTEM POLYURETHAN PU 806 E

Top coat

KLB-SYSTEM POLYURETHAN PU 425 Comfort

Scratch coat with **KLB-SYSTEM EPOXID EP 57** and mixed sand **KLB-Mischsand 2/1**, scattered with quartz sand **Quarzsand 0.3/0.8 mm**

Primer

KLB-SYSTEM EPOXID EP 57
