Terrace with stone carpet

The Object

Terrace with stone carpet
D-87634 Obergünzburg

Category: External surface
Area size: 140 m²
Completion: July 2010

Floor covering:
Utility surface that fulfills
high optical demands and is
weather-resistant

Area type:
Terrace

Requirements:
Decorative appearance and
individual configuration

Insight: Decorative and weather-resistant

Besides tiles or wood, floors made of reactive resin can give patios an exceptional, unique look. Stone carpets for outdoor use in particular not only offer a beautiful appearance, but also permanently high resistance to all kinds of weather influences.

Stone carpet with a metal rail that visually separates different areas and allows for individual colour design.

KLB DECOR STONE-CARPET PU Outdoor

EXTERNAL SURFACES / TERRACES

Terraces, large balconies or backyards extend the housing space with an additional open-air place to stay. Therefore, the outdoor area should be individually designable according to the residents' ideas in order to integrate it into the surrounding living environment. Just as important, however, is a robust surface that is suitable for exterior use.

With our **System L3 KLB DECOR STONE-CARPET PU Outdoor**, a weather-resistant, hard-wearing patio coating made of decorative pebbles can be realised in harmony with the garden and house. At the same time, the stony, naturalistic look creates a cosy feel-good atmosphere.

The decorative pebble flooring can be adapted to personal preferences thanks to the wide range of available colours and the possibility of incorporating unique patterns with rails. A wind rose worked into the surface thus not only provides a contrast and acts as an eye-catcher, but also reflects an authentic, lively style.

Among the product characteristics, the extremely good resistance to permanent solar radiation and the insensitivity to all other possible weather conditions are a particular advantage. This leads to an extraordinarily long durability of the stone carpet.

Varnish layer with
