## FLAIR for your floor: stylish elegance with PU 414 FLAIR

Decorative PU coating with a uniquely structured finish for exclusive floors

## Sustainable. Comfortable. Aesthetic.

PU 414 FLAIR – The flexible coating for premium interiors

Jointless 2-component PU coating offering elastic walking comfort, highly decorative and fully customisable – ideal for both renovation and new-build projects, environmentally friendly due to its high proportion of natural and renewable raw materials.

## Character in every space

From private homes to public buildings – always the right choice. The four-layer build-up using PU 414 FLAIR, in combination with carefully selected KLB products, delivers a perfect balance of functionality, design and sustainability (see build-up on the right).

## Your floor, your style – Unlimited design possibilities:

Individually structured – applied by trowel or squeegee

Available in elegant plain colours or trendy pastel shades

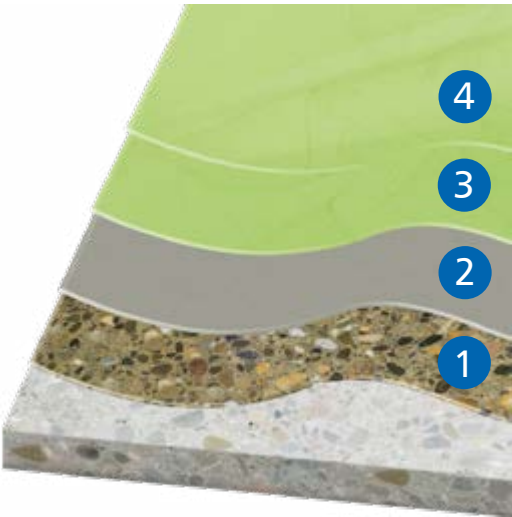

Optionally slip-resistant up to R11 for surfaces requiring enhanced safety

Ideal for renovating existing surfaces, including mastic asphalt or mixed substrates

## System build-up: creating design floors – one layer at a time

Build-up of coats	KLB product
Primer	KLB-SYSTEM EPOXID EP 57 / EP 58 / EP 53 Spezialgrund AgBB / EP 54 Rapid U
Scratch coat / Intermediate layer	KLB-SYSTEM POLYURETHAN PU 429
Utility layer	KLB-SYSTEM POLYURETHAN PU 414 FLAIR
Top sealer	KLB-SYSTEM POLYURETHAN PU 817 Flex

For even greater durability, the flooring is protected with the transparent, elastic matt sealer **PU 817 Flex**. This low-VOC seal reliably protects against mechanical stress, staining, and chemical exposure. An R10 version is also available for areas requiring increased slip resistance.

## Extensive colour variety for creative room designs: selected shades from the colour chart

The present illustrations may be falsified during printing. In case of doubt, please request an original sample.

### Areas of application:

- particularly suitable for recreation rooms – certified as low-emission by EMICODE EC1<sup>Plus</sup>. Compliant with AgBB.
- living areas, e.g. loft flats
- exhibitions and business facilities
- offices and meeting rooms
- medical offices, schools or daycare facilities
- changing rooms in fitness and wellness centres
- museums, hotels, libraries

PU 414 FLAIR combines creative surface design with healthy indoor living. Its ease of

application enables fast realisation of individual design concepts. Thanks to its low-emission formula and DGNB listing (German Sustainable Building Council), the system is the ideal solution for sustainable and high-end construction projects.
